**Lindsay Gray, FNP-BC, joins All About You Regenerative Medicine & Wound Care**

Lindsay Gray, a family nurse practitioner in St. Augustine who specializes in whole body advanced wound care, began practicing at All About You Regenerative Medicine & Wound Care on Aug. 1.

“Lindsay has extensive experience overseeing the full cycle of wound care, including pressure ulcers, venous and arterial ulcers, diabetic foot ulcers, burns, and traumatic wounds,” said Dr. Rosana Rodriguez, owner of All About You. “She is one of the only providers in St. Augustine practicing wound care for the whole body, and we’re happy to have her on our team.”

Gray has more than eight years of clinical experience. Her duties have included advanced wound care debridement and assessment, wound management, ordering diagnostic tests to prevent bone infections, collaborating with primary care providers, and patient education.

She also worked for Flagler Hospital in St. Augustine and Baptist Medical Center South in Jacksonville.

Gray attended Massachusetts College of Pharmacy and Health Sciences and graduated in 2011 with a bachelor’s degree in nursing. She spent six years as a registered nurse before enrolling in Simmons College in Boston, where she earned her master’s degree in nursing in 2019.

She is board certified as a family nurse practitioner by the American Nurse Credentialing Center.

In addition to wound care, Gray will practice regenerative medicine – a new field with many applications to restore function to damaged tissue and organs. Her services will include platelet-rich plasma and amniotic stem cell joint injections, facelifts, hair restoration and sexual wellness for men and women.

All About You Regenerative Medicine & Wound Care is part of All About You – a medical practice that specializes in podiatry, vein care, wound care and regenerative medicine. Its board-certified providers use state-of-the art equipment to treat patients with problems associated with their feet and legs, as well as wound care and regenerative medical procedures for the entire body.
