

Big Horn Ankle and Foot

Foot and Ankle Problems

- About 19% of the U.S. population have an average of 1.4 foot problems each year.

- Approximately 5% of the U.S. population have foot infections, including athlete's foot, other fungal infections and warts each year.

- About 5% of the U.S. population has ingrown toenails or other toenail problems each year.

- Nearly 5% of the U.S. population has corns or calluses each year. Of the three major types of foot problems (infections, toenails and

corns and calluses), people are less likely to receive treatment for corns and calluses.

- Relatively 6% of the U.S. population has foot injuries, bunions, and flat feet or fallen arches each year.

- It is estimated about 60% of all foot and ankle injuries, reported by the U.S. population older than 17, were sprains and strains of the ankle.

- As people age, the prevalence of toenail problems, corns and calluses, bunions, and toe/joint deformities increase.
