

RIGHT-OF-WAY MAINTENANCE NOTICE

Beginning the week of July 13, 2026, Benton County Electric System will begin right-of-way maintenance in the following areas. This work will be completed through low-volume, selective spot spraying and is part of our ongoing efforts to maintain safe and reliable electric service.

Areas include:

From Mt. Moriah south to Birdsong

Across Interstate 40 into the Sugar Tree area

The entire Holladay area

Along Highway 641 from Soghrum Road south

Volunteer Vegetation Management, a Tennessee state-licensed contractor, has been contracted by BCES to perform this year's right-of-way maintenance.

Right-of-way maintenance is an important part of preventing power outages, improving system reliability, and maintaining safe clearances around electric distribution lines.

While BCES has the responsibility and authority to maintain vegetation within our electric rights-of-way, we understand that some properties may have unique circumstances or special considerations. If you have concerns about the planned maintenance near your property, please contact us before work begins so we can discuss your situation and determine whether reasonable accommodations can be made while maintaining the safety and reliability of the electric system.

If you have any questions or concerns, please contact our Right-of-Way Foreman, Nathan Leonard, at 731-584-8251 Ext. 407.

We appreciate your understanding and support as we work to provide safe, reliable electric service to our community.
